FOR IMMEDIATE RELEASE

12/7/2023

HEADLINE: Aerospace Experts Partner Together to Better Serve the Industry

ACD Consultants and Texas Aerospace Services (TAS), both leaders in the Aviation MRO sector, would like to announce their strategic partnership. This collaboration marks a significant step toward achieving both the individual goals of the partners and the objectives of their customers. Both parties bring expertise in their specific fields to better serve the MRO Sector at large.

The partnership's aim is to enhance the repair and overhaul services of TAS by pairing with ACD's expertise in engineering and certification services. Both companies offer a unique suite of capabilities that provides significant value to its customers in the form of reduced turn times, expedited manufacturing support and extensive engineering and certification processes.

Per Cavin Hill, President of TAS, "Texas Aerospace Services is very excited to enter into this partnership with ACD. We feel with that ACD's added engineering support will enable TAS to better support our customers by adding new capabilities to our repair and overhaul services."

Mike Campbell, President of ACDc, "We are certainly aligned on our partnership being driven by a mutual motivation to unselfishly partner for result driven solutions."

About ACD Consultants

ACD Consultants is an aviation engineering firm born out of a conference that was committed to leading education for DER's that supports the FAA mission, "to provide the safest, most efficient aviation systems in the world". This same mission has followed ACD as a firm. Staffed with DER's of all disciplines and focused on the companies values, ACD provides the very best certification and testing solutions to the aviation industry.

"At ACDc we focus on our team first, then encourage planning and customer focused delivery models, that are entrepreneurial based. By using proven standardization, open book management techniques, and a focus on having fun we deliver."

About Texas Aerospace Technologies

Texas Aerospace Technologies delivers NextGen aviation products that enhance the safety of flight through distribution and certification. We provide quick fulfillment of quality products and services while maintaining the highest level of integrity. We are more than a supplier; we are your partner, product consultant, technical support, and developer team. We put our 90+ years of combined avionics experience to work for your sustainability and growth.
